Life Skills-1 Myself and Family

Life Skills-2 Health and Safety

**I Don't Want To Fall Sick.**

**Germ causes diseases. But what are Germs?**  
Germs are tiny invaders. They are so small that they creep into our bodies without being noticed. They are living things, that can make you sick. Germs are in the air all around us. They are most in the crowded places.

**Activity**  
What could be used to kill germs?

Germs may be breathed out by people. They may also live on things that we touch.

Germs are too small for us to see without a microscope, an instrument through which you can see a tiny object clearly.

Our hands pick up germs easily when we touch contaminated things. Even if they look clean there are germs on them that we cannot see.

If you practise good hygiene, germs will not be able to make you sick. Germs can cause stomachaches or colds and a sore throat.

Washing your hands with soap and water kicks the germs off.
